Summary

MERN Stack Developer with 6+ months of professional experience building and maintaining production-ready web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in developing RESTful APIs, authentication and authorization systems, role-based access control, responsive user interfaces, and third-party API integrations. Experienced in working on real-world projects, collaborating with development teams, and delivering scalable and reliable web solutions.

Experience

Mern Stack Developer — Live Projects

Apr 2026 – Present

IIFA Tech

Lahore, Pakistan

- Working on live production projects, developing and maintaining full-stack web applications using the MERN stack.
- Developing responsive and reusable UI components using React.js and Tailwind CSS.
- Implementing RESTful APIs using Node.js and Express.js, integrating MongoDB for data management.
- Implementing authentication, authorization, and role-based access control across application modules.
- Collaborating with senior developers to debug issues, optimize application performance, and deliver production-ready features.

Mern Stack Developer Intern

Jan 2026 – Apr 2026

IIFA Tech

Lahore, Pakistan

- Built and enhanced web application features using React.js, Node.js, Express.js, and MongoDB.
- Developed reusable React.js components and responsive interfaces using Tailwind CSS.
- Created and integrated RESTful APIs and implemented MongoDB schemas and CRUD operations for application modules.
- Collaborated with senior developers to debug issues, follow development workflows, and improve code quality.

Skills

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Component-Based Architecture

Backend: Node.js, Express.js, RESTful API Development, JWT Authentication, API Integration, MVC Pattern

Database: MongoDB (Schema Design & CRUD Operations)

Tools: Git, GitHub, Postman, Vercel

Development Practices: Secure API Design, Database Schema Design, Responsive Design, Git Workflow

Projects

EduVerse – Virtual Learning Ecosystem | GitHub

- Built a full-stack e-learning platform with Teacher and Student dashboards supporting unlimited course and video uploads.
- Integrated Stripe payment gateway and Gemini AI chatbot API for real-time student query resolution.
- Implemented student subscription logic restricting enrollment to a maximum of 3 teachers, enforcing structured learning paths.

Staylo – Property Rental Platform | GitHub

- Developed a rental portal with role-based authentication and custom workflows for User, Owner, and Admin roles.
- Built Owner dashboard for property listing and submission, and Admin panel for approval, rejection, and platform oversight.
- Designed scalable MVC backend architecture handling complex relational data and secure rental agreement workflows.

Ivory Construction Website | GitHub

- Developed a responsive corporate web portal showcasing active construction projects and global services.
- Integrated Google Maps API for interactive project locations, WhatsApp API, and custom Email API for client communication.
- Independently researched and resolved complex third-party API integration challenges, improving solution delivery.

Dental Clinic Management System

- Developed and deployed a full-fledged dental clinic management platform using Next.js with a scalable, production-ready architecture.
- Built role-based dashboards and workflows for managing patients, appointments, leads, tasks, revenue, and clinic operations.
- Implemented authentication, role-based access control, permission-based feature access, and centralized data scoping across organizations and clinics.

Education

Minhaj University Lahore

Bachelor of Science in Information Technology

2021 – 2025

Lahore, Pakistan
